Professional Summary

Results-driven UI Developer and UI/UX Designer with **7+ years of experience** designing and building high-performance, accessible web applications. Combines a strong command of modern front-end technologies (React.js, JavaScript, HTML5/CSS3) with deep expertise in design tools (Figma, Adobe XD) to deliver pixel-perfect interfaces that are both visually compelling and technically sound. Adept at leading end-to-end design workflows — from wireframes and prototypes to production-ready code — within Agile cross-functional teams. Consistent track record of improving usability, reducing design-to-dev handoff friction, and aligning UI outcomes with business objectives.

Technical Skills

Front-End Dev	HTML5, CSS3, JavaScript (ES6+), React.js, Material UI, Responsive Design, Cross-Browser Compatibility
Design Tools	Figma, Adobe XD, Adobe Photoshop, Canva, After Effects, Filmora, Wondershare
Prototyping	Figma, Proto.io, InVision, Interactive Wireframing
Version Control	Git, GitHub, Git Workflows, CI/CD Collaboration
Productivity	MS Excel, PowerPoint, Office 365, Agile / Scrum
Design Practices	Design Systems, UI Style Guides, Accessibility (WCAG), Usability Testing, UX Research, Information Architecture

Professional Experience

UI Developer / UI Designer

Sep 2025 – Present

D3E Studio Private Ltd · Hyderabad, Telangana

Project: D3E Studio

- Developing and maintaining responsive front-end interfaces as part of the core UI team at D3E Studio, a Hyderabad-based product studio.
- Building reusable UI components using modern front-end technologies, ensuring consistency across screens and adherence to design specifications.
- Collaborating closely with designers and back-end developers to translate wireframes and mockups into clean, production-ready code.

Senior UI Developer / UI Designer

June 2018 – Aug 2025

Nitya Software Solutions · Hyderabad, India

Project: JobsnProfiles — Job Seeker & Employer Portal

- Architected and delivered the end-to-end UI of a large-scale job portal, serving thousands of job seekers and employers; reduced page load time by optimising asset delivery and component rendering in React.js.
- Produced wireframes, interactive prototypes, and high-fidelity mockups in Figma and Adobe XD, shortening design-review cycles and accelerating developer hand-off.
- Established a reusable component library and UI style guide using Material UI, ensuring visual and typographic consistency across 20+ platform screens.
- Integrated RESTful APIs to surface dynamic job listings, employer profiles, and real-time notifications, improving content freshness and user engagement.
- Partnered with product managers and back-end engineers in Agile sprints; participated in daily stand-ups, sprint planning, and code reviews to maintain on-time delivery.
- Conducted usability testing sessions and translated user feedback into iterative UI improvements, contributing to measurable gains in task completion rates.
- Enforced cross-browser compatibility and WCAG accessibility standards across Chrome, Firefox, Safari, and Edge.

UI Developer / UI Designer

May 2024 – Aug 2025

Nitya Software Solutions · Hyderabad, India

Project: Virtual Job Fair — Online Event Platform

- Spearheaded front-end development of a Virtual Job Fair platform built with React.js, enabling real-time interaction between job seekers and recruiters in a fully digital environment.
- Designed and enforced a comprehensive UI style guide and component design system, ensuring brand consistency across all platform modules.
- Integrated real-time messaging APIs, facilitating live chat and interview scheduling between candidates and employers with sub-second latency.
- Translated UX wireframes into production-grade code through close collaboration with back-end developers, achieving pixel-perfect fidelity with minimal revision cycles.
- Performed rigorous front-end testing and performance profiling, identifying bottlenecks and implementing optimisations that improved rendering speed and user experience scores.
- Integrated employer-profile APIs to display company information, active job listings, and contact details in a structured, accessible layout.

UI Developer / UI Designer (Freelance)

Dec 2023 – Jan 2024

Varahi Consulting Services · Remote

- Redesigned the corporate website for an IT services company, establishing a cohesive visual identity through a new colour system, typography scale, and iconography set.
- Built and documented a design system that maintained brand consistency across all web-facing assets and internal documentation.
- Delivered web-optimised graphics and imagery in compliance with copyright and licensing requirements, reducing page weight by approximately 30%.

UI Developer / UI Designer (Freelance)

Aug 2023 – Sep 2023

Logam Soft · Remote

- Converted UX wireframes into clean, maintainable front-end code, collaborating directly with designers and back-end developers to integrate features seamlessly.
- Created wireframes, prototypes, and final visual designs aligned with project requirements and iterative user feedback.
- Maintained and refactored existing front-end components to improve performance, readability, and long-term scalability.

Education

Bachelor of Technology in Computer Science & Engineering

2013

Bandari Srinivas Institute of Technology, Hyderabad, India

Key Highlights

- **7+ years** of continuous, hands-on UI development and design across multiple product verticals including recruitment, events, and IT services.
- Sole UI owner for two major products at Nitya Software Solutions, managing full design-to-code workflows independently.
- Dual skill set bridging **design** (Figma, Adobe XD) and **development** (React.js, JavaScript), enabling faster iteration with fewer hand-off errors.
- Consistently recognised for delivering **pixel-perfect, responsive** interfaces that meet both usability benchmarks and business KPIs.
